Re: Office of Science and Technology Policy Request for Information on the American Research Environment, RFI Response: JCORE, 84 FR 65194, 2019-25604

Dear Executive Director Chloe Kontos:

Asian Americans Advancing Justice | AAJC (Advancing Justice | AAJC) respectfully submits this comment in response to the request for information on the American research environment by the Science and Technology Policy Office (OSTP), published on November 26, 2019. We write to express our concerns about the profiling and wrongful prosecutions for espionage of students, scientists, and researchers of Asian descent under the pretext of securing American research.

Advancing Justice | AAJC is a national non-profit, non-partisan organization that works through policy advocacy, education, and litigation to advance the civil and human rights of Asian Americans and to build and promote a fair and equitable society for all. Founded in 1991, Advancing Justice | AAJC is one of the nation's leading experts on civil rights issues of importance to the Asian American and Pacific Islander (AAPI) community including immigration and immigrants' rights, census, hate incidents, language access, technology and telecommunications, and voting rights.

We appreciate this opportunity to comment on the harms resulting from the profiling of our communities in the American research environment. At various times in our Nation's history, AAPIs have borne the brunt of this country's xenophobia. AAPIs have been made the face of the "yellow peril," the "spy," and "the terrorist." Despite being part of the fabric of American society for centuries, Asian immigrants and their descendants are still caught up in the construct of the "perpetual foreigner." From the Chinese Exclusion Act of 1882 to the incarceration of Japanese Americans during WWII, to the murder of Vincent Chin and the surveillance and profiling of Muslim and South Asian Americans, AAPIs are living in the midst of the latest wave of resurgent xenophobia. Not only are AAPI communities profiled by our own country as spies and terrorists, the xenophobic rhetoric in our political discourse has created a toxic atmosphere, emboldening those who would act on hate, terrorizing our communities.

While we acknowledge the importance of protecting American research and that the Chinese Government is engaging in economic espionage and intellectual property theft, Advancing Justice | AAJC seeks to

draw OSTP’s attention to harmful and ineffective racial profiling conducted by the FBI in its surveillance and profiling of Asian Americans and Asian immigrants. Biased public statements by public officials combined with data and individual cases indicating that there have been wrongful arrests and prosecutions of innocent Asian Americans have raised red flags for us that the FBI may be engaged in biased policing. Despite the ongoing issues of implicit bias, discrimination and race & ethnicity-based profiling, the U.S. government has called for expanding efforts that would lead to more wrongful prosecutions of Asian Americans and Asian immigrants. We encourage OSTP to consider the facts below in contemplating any further analysis or efforts that may lead to the profiling and wrongful prosecution of members of our community.

I. General Comments

The U.S. government seeks to increase efforts to prevent the Chinese government from obtaining U.S. research. On November 19, 2019, the Permanent Subcommittee on Investigations held a hearing entitled, “Securing the U.S. Research Enterprise from China’s Talent Recruitment Plans”. The hearing addressed the threat posed by Chinese talent recruitment plans, in particular the Thousand Talent Plan (TTP), to the U.S. research enterprise. Although Advancing Justice | AAJC recognizes that there are instances of actual economic espionage, we are concerned with current rhetoric, policies, and efforts that increase bias and discrimination against Asian Americans and Asian immigrants. Existing bias and profiling has harmed and continues to harm the lives of Asian students, scientists, and researchers. Profiling of our communities does not make the United States safer, and serves only to undermine the very values and characteristics that propelled the United States as a global leader in innovation, science, and technology.

The current social and political environment has created fear among our communities as rhetoric from public leaders encourages bias and fosters hate against Asian nationals and Asian Americans. FBI Director Chris Wray painted a broad brush for all persons of Chinese descent when he stated that the FBI “in almost every field office ... around the country” sees counterintelligence risks in Chinese professors, scientists and students “across basically every discipline.”¹ Director Wray cast all of the hundreds of thousands of Chinese professionals and students in academia as potential threats to the U.S.² At the highest office, President Donald Trump stated, “[A]lmost every student that comes over to this country [interpreted as referencing from China] is a spy.”³ This rhetoric creates a climate of fear that chills free speech and has a detrimental effect on American academia and research by discouraging immigration

Bureau of Investigation); see also Elizabeth Redden, *The Chinese Student Threat?*, INSIDE HIGHER ED (Feb 15, 2018), <https://www.insidehighered.com/news/2018/02/15/fbi-director-testifies-chinese-students-and-intelligence-threats>.

² Our organization signed a letter requesting a meeting with Director Wray on March 1, 2018 along with other civil rights organizations regarding his statement and we have yet to receive a meeting. See here for more information: http://www.committee100.org/press_release/community-organizations-call-for-meeting-with-fbi-director-christopher-wray-regarding-profiling-of-students-scholars-and-scientists-with-chinese-origins/.

³ Annie Karni, *Trump Rants Behind Closed Doors with CEOs*, POLITICO (Aug. 8, 2018), <https://www.politico.com/story/2018/08/08/trump-executive-dinner-bedminster-china-766609>.

from the best and brightest minds from all around the world. This messaging encourages bias by law enforcement officers, government officials, employers and colleagues to view students and scholars of Asian descent as suspect, increasing surveillance and the likelihood of false reporting and arrests without proper evidence and errors in investigations, which as described below, Asian American scientists are already experiencing. The current political environment has made many Chinese nationals along with other immigrants feel unwelcome here. Recent rhetoric echoes anti-Chinese and anti-Asian sentiments from the past, and follows a long history of wrongful prosecutions of Chinese Americans for espionage-related crimes.

Advancing Justice | AAJC opposes increased efforts to scapegoat and profile Asian Americans and Asian immigrants. We describe below existing agency biases and profiling, and how efforts to prosecute our communities for espionage-related claims have been extremely harmful. Furthermore, we provide reasons for our opposition to escalating these efforts which only serve to undermine our American values. We caution against overly broad policies which would exclude the vast majority of students, scientists, and researchers of Asian descent who contribute to the U.S. research enterprise, our economy, and our communities.

II. The FBI has Engaged in Biased Policing and Profiling of Individuals of Asian Descent

Advancing Justice | AAJC has been concerned with the unjust prosecutions and racial profiling of Asian immigrants and Asian Americans harming the lives of not just individuals, but families and whole communities. Asian Americans and immigrants have increasingly been criminalized, stereotyped as “perpetual foreigners,” and profiled as spies disloyal to the United States. In recent years, Advancing Justice | AAJC has grown concerned that the FBI is engaged in biased policing and is profiling individuals of Asian descent as guilty of espionage based on their ethnicity or race.

The stereotyping of individuals of Chinese descent comes from the very top. According to FBI Director Christopher Wray, the FBI is investigating over 1,000 cases of U.S. IP theft and that “‘almost all’ lead[] back to China.”⁴ According to a recent Bloomberg report’s study of over a dozen former federal investigators, “[the] distrust of people of Chinese heritage [too often] drives decision-making at the FBI and other U.S. security agencies.”⁵ The report found that the FBI started an initiative that mapped out U.S. neighborhoods by race and ethnicity to monitor potential terrorists and spies in 2005.⁶ An FBI memo revealed that the FBI continued the initiative by doing an assessment for Chinese communities in San Francisco in 2009.⁷ Moreover, the FBI collaborated with the U.S. National Institutes of Health (NIH) which “started probes into some 180 researchers at more than 70 hospitals and universities, seeking undisclosed ties to China.”⁸ Not only were strategic decisions and investigations based on this inherent

distrust of those of Chinese descent, but training materials were created that perpetuated and created a culture of bias and distrust against Asian Americans and Asian immigrants.

In his book, *Disrupt, Discredit, and Divide*, former FBI agent Mike German described the problem of stereotyping and profiling of Asian Americans and other racial minorities within the FBI post 9/11. He specifically discussed counterintelligence training materials that heavily stereotyped Asians and created a sense of otherness. One presentation meant to educate FBI agencies about “the Chinese” included a slide that warned, “Never attempt to shake hands with an Asian.”⁹ The ACLU obtained FBI counterintelligence materials, and one training presentation “warn[ed] agents against giving too many compliments to a Chinese woman as it might suggest a romantic relationship is desired, [and] another [told agents] to never stare at or attempt to shake hands with an Asian.”¹⁰ German argued that these stereotyping of Chinese Americans as high risk for espionage “blind[ed] agents to real threats.”¹¹ He described the training as “more likely to implant bias than to educate agents about the complex behavior of spies.”¹² These training materials, lack of diversity, and existing practices fostered an environment ripe for bias and profiling against Asian Americans.¹³

According to German, even Asian FBI agents and other federal agency employees of Asian descent have felt marginalized and targeted by the agencies they served.¹⁴ The Bloomberg report analyzed over 26,000 security clearance decisions for federal contractors since 1996, and found that the China-related denial rate for clearance applicants increased from 44% from 2000 through 2009 to 61% from 2010 to October 31, 2019.¹⁵ Prior to 2009, clearance applicants with Chinese connections were denied at the same rate as other countries.¹⁶ Now, denial rates for those with Chinese connections are higher than for any other country.¹⁷ While some of this increase may be legitimate, there is evidence that the system is biased towards Type I errors or false positives when Chinese connections are involved. Wei Su, a former scientist for the U.S. Army, is an example of a government employee impacted by bias against people with connections to China embedded in government processes. Despite 24 years of working for the government, he found himself in the midst of an FBI investigation starting in 2011 where he was placed

under surveillance, threatened with arrest, and stripped of his security clearance.¹⁸ For years, Mr. Su fought to clear his name. Finally, this past May, the Pentagon’s Consolidated Adjudications Facility (CAF) rescinded the Pentagon’s previous letters that suspended and revoked Su’s security clearance.¹⁹ The increases in security denials, arrests with scant evidence and rhetoric by the administration has led to a chilling effect where Americans and immigrants choose not to travel to China to visit family or friends for fear of the distrust that would result from familial connections in China.²⁰ A 61-year-old Chinese American who immigrated to the United States in 1985 and has two U.S. citizen daughters sought security clearance for defense contracts for his machinery-design company.²¹ Although the Defense Office of Hearings and Appeals (DOHA) Judge Noreen Lynch concluded that there was no evidence that he and his immediate family were approached by Chinese intelligence agents, she ruled in favor of the U.S. government and denied clearance.²² She took “‘administrative notice’ of a U.S. finding that China and Russia are ‘the most aggressive sponsors of economic spying.’”²³ She found that the “[a]pplicant’s close relationship to his father and sisters, who are vulnerable to potential Chinese coercion, outweighs his connections to the United States.”²⁴ This has significant potential ramifications for many Asian Americans who face bias as perpetual foreigners and endure inherent assumptions against their loyalty to the United States.

III. The U.S. Government Disproportionately Targeted Asian American and Asian Immigrants for Espionage

The United States government charges, prosecutes, and sentences Asian Americans and Asian immigrants for espionage at a disproportionate rate indicating the presence of bias and racial profiling. A white paper authored by Andrew Kim and published by the Chinese American organization, Committee of 100²⁵ revealed that data supports that racial bias exists in the charging, prosecution, and sentencing of people of Asian heritage.²⁶ Since 2009, people of Asian heritage were more likely to be charged under the Economic Espionage Act of 1996 (EEA) than any other group.²⁷ According to the study, “62% of EEA defendants charged since 2009 have been people of Asian descent.”²⁸ The overall percentage of

²⁶ The study analyzes data of 136 cases selected as random samples of individuals charged under the Economic Espionage Act (EEA) from 1997 to 2015. All data was taken from publicly available court documents from the Public Access to Court Electronic Records system (PACER).

²⁷ *Id.* at 8.

²⁸ *Id.* at 6.

individuals who are of Asian heritage charged under the EEA has increased with those of Chinese heritage alone having tripled since 2009.²⁹ For these individuals of Asian descent who were prosecuted, the rate at which they were “acquitted at trial, pled guilty only to ‘false statements’ and released on probation, or, most often, had all charges dropped against them” was two times higher than individuals of any other race.³⁰

In addition, there is a significant disparity for sentencing. Of those convicted, people with Asian names were given sentences twice as long than those with Western names.³¹ The average sentencing for defendants convicted of espionage with Asian names was 22 months compared 11 months for those with Western names.³² Asian Americans and immigrants are left vulnerable to a system that is biased and have led to too many instances in recent years of Asian Americans being wrongfully prosecuted for espionage-related crimes.

Individuals of Chinese or Asian descent are disproportionately targeted compared to other groups for espionage crimes.³³ Andrew Kim expanded on his earlier study in a *Cardozo Law Review* article where he suggested ways in which implicit bias against Chinese and Asian defendants may implicate prosecutions in espionage cases. Prosecutors may be engaging in bias by filing charges early because they perceive Asian defendants to be a greater flight risk due to the pervasive “perpetual foreigner” stereotype³⁴ or filing based on weak evidence because of a preconceived notion that Asians are spies.³⁵

Moreover, the article illustrates a potential problem of “pretextual prosecutions”.³⁶ Prosecutors with implicit bias profile Asian Americans based on their ethnicity or race charging them for the more serious offense of espionage. When the Asian defendant is not found guilty, prosecutors will try to convict him or her of a minor offense such as making a false statement made during the investigation. This would effectively punish the Asian defendant despite the prosecution being a result of initial racial profiling and implicit bias.³⁷ This was the case with Sherry Chen, a Chinese American hydrologist charged with stealing flood pattern data. During the course of the investigation, investigators asked Chen when she last saw a former classmate, and she told them, “I think 2011” when she had actually met in 2012.³⁸ Although Chen was not found guilty as all charges were dropped against her, prosecutors had sought to convict her of making a false statement.³⁹ These are not merely studies, but translate to real human ramifications for

²⁹ *Id.* (According to the study, from 1997 to 2009, 17% of EEA defendants were of Chinese descent while 9% were other Asians. This number tripled to 52% for Chinese defendants.)

those innocent individuals including American citizens whose reputations and livelihood were ruined as a result of the government's targeting and racial profiling of Asian Americans.

IV. The U.S. Government Should Not Expand Prosecution Efforts

Despite the ongoing issues of implicit bias, discrimination, and race & ethnicity-based profiling, the U.S. government called for expanding efforts that would lead to the potential targeting of Chinese and Asian Americans and immigrants. The Permanent Subcommittee on Investigations called for seven federal agencies and universities to increase efforts against the threat to U.S. research enterprise posed by Chinese talent recruitment plans both in their hearing and in their published report.⁴⁰ Given all the indications of bias explained above, we caution against escalating investigative efforts without first addressing existing biases that harm Asian Americans and immigrants. As the government increases efforts against Chinese espionage, more innocent defendants of Asian heritage, including Americans, will be arrested, and then prosecuted or, even if they are not prosecuted, suffer irreparable harm.

Innocent individuals such as Wen Ho Lee, Guoqing Cao, Shuyu Li, Sherry Chen, and Xiaoxing Xi, are permanently harmed. The use of stereotypes and biases prevalent in the FBI is extremely harmful and leads to the wrongful prosecutions of individuals subjected to profiling. Former FBI agent German stated, “The [FBI] training is a form of othering, which is a dangerous thing to do to a national security workforce learning to identify the dangerous ‘them’ they’re supposed to protect ‘us’ from.”⁴¹ This danger of othering is all too real for many Asian Americans. In December 1999, the government prosecuted Wen Ho Lee, a Taiwanese American scientist, accusing him of passing secrets to the Chinese government about a U.S. nuclear program despite lacking evidence of espionage.⁴² Although Lee received restitution, great damage had been done. In addition to suffering from a damaged reputation, he spent nine months in solitary confinement and was denied basic legal protection under the law.⁴³ In 2013, a federal grand jury indicted two former Eli Lilly and Co. senior biologists, Guoqing Cao and Shuyu “Dan” Li, on charges of stealing nine drug discovery trade secrets and passing them to a Chinese drug company.⁴⁴ The U.S. attorney's office later requested the dismissal of all charges but neglected to specify the reasons for doing so.

⁴³ *Id.*

⁴⁴ *Feds dismiss charges against former Eli Lilly scientists accused of stealing trade secrets*, INDY STAR (Dec. 5, 2014), <https://www.indystar.com/story/news/crime/2014/12/05/feds-dismiss-charges-former-eli-lilly-scientists-accused-stealing-trade-secrets/19959235/>.

In 2014, federal agents accused Sherry Chen, a Chinese American hydrologist then employed at the National Weather Service, of using a stolen password to download information from a federal dam database and of lying about meeting with a high-ranking Chinese official.⁴⁵ Chen had sent publicly available information to a former classmate in China and then connected him to a colleague for further information about his inquiry. The colleague reported her. The Justice Department dropped the case after finding no evidence of espionage, but the Commerce Department in 2015 announced its plan to fire Chen. Although the federal Merit Systems Protection Board in April 2018 ruled in favor of her reinstatement and suggested that Commerce officials had buried exculpatory evidence, the Commerce Department plans to appeal the ruling and proceed with her dismissal.⁴⁶

In 2015, Xiaoxing Xi, a Chinese American physics professor at Temple University, was accused by the Justice Department of sharing sensitive American-made technology with Chinese scientists.⁴⁷ Without consulting with experts to understand the technology, FBI agents and prosecutors branded Dr. Xi as a Chinese spy. He was eventually vindicated after independent experts discovered that the information that he shared for academic purposes was not classified and perfectly lawful. These cases lead us to believe that race and ethnicity based profiling are indeed driving these prosecutions.⁴⁸ Examined in conjunction, these cases validate a disturbing yet ongoing trend – the criminalization of Asian Americans in the name of national security. When a subset of the population is regarded as “perpetual foreigners” or as “the other,” national security arguments can easily overshadow civil and human rights considerations. We only need to recall the mass incarceration of Japanese Americans during World War II to reflect on the inhumanity of systemic marginalization.

The impact of these biases and profiling extends to international scholars, particularly to Chinese students seeking to study and contribute to academia in the United States. FBI surveillance and prosecution of individuals of Asian descent has created a chilling effect at universities and fosters an environment of fear discouraging students from studying here. According to the most recent State Department *Open Doors* report, there has been a 6.6% decrease in new international student enrollment in 2017/18 which was double the rate of decrease from the previous year.⁴⁹ This marked “the first time America has seen a two-year decline”, and signified the shift in perception by international students of how welcoming the United States is.⁵⁰ The loss of international students, including those from China, is a tremendous loss for the United States. Overall, foreign students contribute \$39 billion to our country, and have created or supported more than 455,000 jobs just within the 2017-2018 academic year.⁵¹ Although Chinese students

make up only 1.7% of the total U.S. higher education enrollment, they contributed about \$12 billion to the U.S. economy in 2016 according to the State Department's *Open Doors* report.⁵²

Moreover, many of these students go on to become citizens and have families here in the United States. They become integral parts of our communities and contribute to research, education, and building a robust economy. Asian Americans and immigrants are a boon to our economy and help create jobs. Asian Americans own over a third of all immigrant-owned businesses in the United States.⁵³ There are over 1.1 million Asian American immigrant-owned business in the United States.⁵⁴ Asian Americans and immigrants contribute to the vitality of this country. We are a country of immigrants and prosper when we protect our American ideals.

V. The U.S. Government Should Reexamine Existing Procedures to Find Ways to Improve and Eliminate Bias and Profiling

Rather than increasing efforts or having a more aggressive approach to prosecuting for economic espionage, our intelligence agencies must examine existing procedures to find ways to improve and eliminate implicit bias and profiling that ruin innocent lives. Racial profiling harms American citizens and creates fear among our communities. It is both ineffective and counterproductive.⁵⁵ Racial profiling only serves to make us less safe and continues to be a strategy that is both ineffective and unjust.

Agencies should conduct trainings for employees such as anti-bias training. The number of arrests made based on weak evidence, assumptions, or error should be decreased. The United States government should provide transparency about the process for surveillance, arrest, and prosecution of Asian Americans and immigrants for espionage related cases. Increasing efforts despite existing issues of bias and profiling serves to only harm the lives of many innocent Americans including families and goes against our American ideals.

Thank you for the opportunity to submit comments on the American research environment. Please do not hesitate to contact Gisela Perez Kusakawa or Megan Essaheb to provide further information.
